Mann Packing launches air fryer veggie kits

January 23, 2023

[Mann Packing Co. Inc.](#), a subsidiary of Fresh Del Monte N.A. Inc., launched its brand-new Mann Air Fryer Veggie Kits — ready-to-use veggie kits created for air fryers.

Officially launched during the IFPA Global Produce & Floral Show in October 2022, Mann Air Fryer Veggie Kits feature the company's new logo and exemplify innovation specifically developed for air fryer cooking. This convenient, in-home meal option comes at a time when Americans are becoming more cost-conscious.

Studies show 91 percent of consumers will be eating at home more due to inflation-related cost pressures. These unique and delicious kits are also the perfect solution for consumers looking to incorporate more vegetables into their diet, as nine out of 10 Americans do not eat enough vegetables.

Air fryers have become ubiquitous in American households, with more than 40 percent having one. Equally convenient for both microwaves and air fryers, Mann Air Fryer Veggie Kits offer healthy, flavorful and perfectly seasoned veggies in less than eight minutes. They are available in three delicious, yet nutritious flavors — Broccoli with Lemon Herb, Cauliflower with Parmesan Peppercorn and Green Beans with Charred Onion & Bacon — in 7.8-ounce to 8.8-ounce bags.

Mann Air Fryer Veggie Kits are currently available at Meijer, Lunds & Byerlys, Dierbergs and select Walmart locations across seven states, retailing at \$3.99 in most markets.
