Windset Farms showcase yoom black cocktail tomatoes at CPMA convention

April 20, 2023

[Windset Farms](#) is thrilled to be back at the annual CPMA Convention and Tradeshow in Toronto, Ontario. Showcasing new and innovative products, like YOOM Black Cocktail Tomatoes, as well as classic crowd favorites, Windset is excited to gage customers interests while discussing potential new opportunities.

The YOOM Black Cocktail Tomato crop is off to a strong start. Walking through the greenhouses and seeing the contrast of color against the greenery is beautiful and exciting as we look to bring more availability to the marketplace. This unique tomato is the color of black pearl on the outside, with a deep scarlet hue on the inside and possesses a savory umami flavor with every bite. Non-GMO Project verified, and sustainably grown, Windset's YOOM Black Cocktail tomatoes deliver on aesthetics, taste, and nutrients, containing high levels of anthocyanins, the pigment found in the tomatoes which provide essential vitamins and minerals.

In addition to YOOM, Windset will be lighting up the New Product Showcase space with their newest snacking tomato item, Tri-Colored Cameo Cherry Tomatoes on The Vine. These gems are the perfect bite sized snack and add a sophisticated pop of color to your favorite charcuterie boards and culinary creations. Windset will also feature their ever-growing line of Organics, 100 percent greenhouse grown, and both USDA and Canada Organic Certified.

Be sure to stop by the Windset Farms booth (#1620) in Toronto to catch up with the team, see what's new and learn more about their prestigious line of Greenhouse Grown produce!
