Industry Viewpoint: A third-generation packer's outlook on organic citrus for 2026–27

By

Vince Mazzetti, vice president of Goody | Blue Banner Co.

July 8, 2026

I didn't choose the citrus business. The citrus business chose me — and I mean that as the highest compliment I know how to pay.

**RNA-based approach shows promise for managing powdery mildew
in roses**

July 8, 2026

Powdery mildew is one of the most common and persistent diseases affecting ornamental crops, including roses. The disease appears as a white, powdery coating on leaves, stems and flowers. Infection can reduce plant quality by redirecting plant nutrients to the fungus, interfering with photosynthesis and altering leaf and flower development. For commercial growers, managing powdery mildew often requires repeated fungicide applications throughout the growing season.
